PERIODICAL CATALOGUE
OF
**GREENHOUSE SHRUBS,
VINES,**
HERBACEOUS PLANTS, AND BULBOUS ROOTS,
CULTIVATED AND FOR SALE AT THE
LINNÆAN BOTANIC GARDEN,
Flushing, near New-York,
WILLIAM PRINCE, PROPRIETOR,

Vice-President of the New-York Horticultural Society; Corresponding Member of the Linnaean Society of Paris; of the Horticultural Societies of London and Paris, and of the Imperial Society of the Georgofili at Florence; Honorary Member of the Massachusetts Horticultural Society, etc.

It will be perceived that numerous and splendid acquisitions have been made to the Greenhouse department, and great perspicuity and attention have been exercised in selecting the most interesting and beautiful. In accomplishing this, the leading object of the Proprietor has always been rather to enrich and aggrandize his establishment, than to be guided by mere pecuniary considerations; very many of the plants having been purchased at an expense of from four to five guineas each. In rare and valuable productions from every quarter of the world, and especially from China and Japan, this collection is particularly rich and interesting.

The prices have been greatly reduced, and are as low or lower than the same articles equally genuine, and of equal quality, can be obtained for elsewhere.

Many species of plants arranged in other Catalogues as Greenhouse Plants, having been found by experience sufficiently hardy to support our winters, are omitted in this Catalogue, but will be found under their respective heads in the Catalogue of Hardy Shrubs, &c. from page 38 to 84 inclusive.

Those checked thus * though generally cultivated as greenhouse plants, will, when well grown, stand the winters of the Middle States in the open air, and a large proportion of the others will support the winters of the Southern States.

Nearly all the following will thrive in a comfortable sitting room during the winter—they are in pots or boxes, and the prices are inclusive.

CAMELLIA JAPONICA, OR JAPAN ROSE.

At the following very reduced prices.

The following collection of Camellias comprises the newest varieties, many of which are very remarkable for their splendour. Those priced at the highest rates, cost the proprietor *five guineas each* for the original plants; and many others from three to four guineas. The prices are now greatly reduced, in consequence of the plants being much increased; but, owing to the universal admiration which this plant has received, and its requiring so little care, and enduring without injury a great degree of cold, the demand has hitherto been very great. The proprietor has at all times very large quantities to supply wholesale orders; and his present collection exceeds 3000 plants, which he is rapidly increasing.

ORANGES, LEMONS, CITRONS, SHADDOCKS, AND LIMES.

Class, *Polyadelphia*. Order, *Polyandria*.

These require sufficient protection in winter to keep them from freezing in the states north of South-Carolina—in the latter state, and those south of it, they do not require it. In Italy extensive nurseries of these fruits are cultivated, some of which contain 200 varieties. A work has recently been published at Paris, edited by Messrs. Risso and Poiteau, which contains engravings and descriptions of 160 varieties, comprising the most valuable and interesting. It is from an inspection of those figured in this work that the new varieties have been selected which are here enumerated: to obtain which has been attended with great difficulties, as the collections of Paris and London possess but few of them.

Those marked thus *, if of 1 year's growth from inoculation, \$2

2 do. do. do. 3

3 do. do. of age for bearing 3 50

Those marked thus ‡ are \$3 50 each. Some of these kinds are three. and others but one and two years' growth.

Those marked thus † will be each \$5, and being quite new, are not at present large.

CHINA ROSES.

Most of which are monthly, or everblooming.

The monthly varieties, when planted in the open ground, are particularly interesting, on account of expanding their flowers in March and April, when those of other kinds have not yet made their appearance. They continue to bloom throughout the summer; but in the autumnal months their numerous flowers also afford particular gratification, as nature then seems most to need their cheering influence. Nearly the whole number support our winters with little or no protection, as designated by the asterisk, those most tender need only to have a box or barrel placed over them during winter.

REMARKS.

THE Trees, Shrubs, and Plants, contained in the annexed Catalogue, can be packed in such manner as to be transported at any season of the year; and all orders from a distance receive the same pointed attention as if the persons desiring them were present to make their selections: information will also be freely imparted with regard to the best means of culture, &c.; and the packages will be shipped to any port designated. Remittances can be made by draft on any city from Portland to New-Orleans. In the transmission of plants to foreign countries, and to the various ports of the Union, New-York possesses decided advantages, regular packets being established with a great number of places, both at home and abroad, and the general facilities of intercourse being so enlarged and increasing.

In offering to the public this Catalogue, the Proprietor cannot refrain from calling the attention of amateurs to the numerous highly interesting trees and plants which it contains, and many of which are found in no other collection in our country. These have, in many instances, been attended with such expenses in their importation, that had a desire for profit *alone* animated the Proprietor, he would not have been so ardent in obtaining them: but desirous that our country should at least hold that rank in her botanic collections which she does in every other respect, and influenced by that zeal which ever inspires the votaries of Flora, he has incurred disbursements to an amount never hazarded by any other individual in the Union. The prices of the plants newly imported are regulated by their absolute *cost*, and will be lessened as their culture may be attended with more or less success; many of those of less recent introduction are now placed at prices much reduced. An establishment so extensive as this, cannot of course be conducted without immense disbursements, in making which the Proprietor has greatly to rely upon the patronage he may receive in the sale of its productions. It is his desire to introduce every Tree, Shrub, or Plant, which may be useful in the various departments of national industry, as well as those which serve to gratify our pleasures alone: and it remains now to be tested, whether the success which shall attend the very extensive importations already made, will warrant their continuance on the same expensive scale. Comprising, as this garden does, an extent of more than 40 acres, *compactly filled*; with the very extensive range of Green-Houses, which contain above 20,000 plants in pots; and being surpassed or equalled by few even of those which have received in foreign countries the patronage of royalty, the Proprietor's most anxious desire has been to give to his establishment the character of a *National Institution*; and animated by those feelings, which all seem concentrated in the "*pride of country*," he relies on that country to aid in its advancement.

As many persons in the Union act as agents for different nursery establishments, it is particularly requested, that where orders are intended for me, it be plainly specified; and every invoice hereafter will have a *printed heading, and my signature, or that of one of my sons, to prove it genuine*. I mention these cautions for good and conclusive reasons, as I know I have been injured by deceptions.

Orders from a distance can be transmitted through an agent, or *direct* by mail or otherwise, and the various demands will be executed with

that accuracy and despatch which characterize the general transactions of the establishment.

The following distinct catalogues and publications relative to the different departments of the establishment may be obtained of the different agents, or by direct application to the proprietor, the four first mentioned being distributed *gratis* :—

No. 1. Fruit and Hardy Ornamental Trees, Shrubs, and Plants, pp. 86.

No. 2. Bulbous and Tuberous Rooted Plants, pp. 24.

No. 3. Green-house Trees, Shrubs, and Plants, pp. 48.

No. 4. American Indigenous Trees, Shrubs, and Plants, pp. 47.

No. 5. A Short Treatise on Horticulture, pp. 206.—Embracing descriptions of about one thousand species and varieties of Fruit and Ornamental Trees and Shrubs, Bulbous Flowers, Green-house Trees and Plants, &c. including a copious Dissertation on the Culture of the Grape, with descriptions of sixty-eight varieties deemed among the most valuable. Price one dollar. Any person remitting the cost of five copies, shall receive the sixth *gratis*.

Now in Press, and will soon be Published.

A Treatise on the Vine ; comprising a copious and complete Dissertation on its Culture, Management, &c. and on the process of making Wine ; with accurate Descriptions and Remarks on the Properties of about Two Hundred and Seventy Varieties of Grapes best suited for Wine and the Table, with a careful arrangement of the Synonymes. A Topographical List of all the most celebrated Vineyards throughout the World, and particularly of those in the different Departments of France, and the mode of culture pursued in those of most note. By WILLIAM PRINCE, Vice-President of the New-York Horticultural Society ; Corresponding Member of the Linnæan Society of Paris ; of the Horticultural Societies of London, and Paris, and of the Imperial Society of the Georgofili at Florence ; Honorary Member of the Massachusetts Horticultural Society, &c.

This Work will comprise all the important information contained in the new edition of DUHAMEL, published in 1825 ; also that contained in the *Nouveau Cours Complet d'Agriculture*, edited by Members of the Royal Institute of France ; together with such additional information as is found in the works of Rozier, Chaptal, Julien, McCulloch, Forsyth, Speechley, Berneaud, and other authors of celebrity. It will be published in two parts, of about 250 octavo pages, *each of which will be complete in itself*.

The First Part will embrace the following heads : *The general History of the Vine*, from the earliest ages to the present period, and a copious Dissertation on climate, soil, culture, &c. accompanied by descriptions of above 200 foreign and 70 native varieties of Grapes.

The Second Part will embrace—*The particular History of the Vine*, comprising a Topographical Account of all known Vineyards throughout the World, and including those of the United States ; with the modes of culture, and the varieties of grapes peculiar to each : whence correct conclusions may be drawn, suited to all the various climates and soils of this country. To this will be added, an ample detail of the various modes of making Wines, with every particular necessary to render any one a complete Vigneron.

The price of the above work will be \$1 for each part, *payable in advance*, and either one or both can be subscribed for.
